# Roger Zhou

Full-Stack Developer

Profile

I aim to make a difference through my creative solution. I love writing robust, clean and reusable code. I am a quick and lifelong learner due to curious personality. I have strong problem solving ability to work within deadline. I work really hard to improve myself as soos as possible.

I am comfortable with the Agile process, and have knowledge of plan-driven developments. Except skills listed blew, I have experienced AWS, Git/SVN, Laravel and MySQL.

Projects

Readable — Feb. - April 2018
http://18.220.21.191/

- Built a content-and-comment web app with React-Redux that allows users to post content to predefined categories; users will also be able to edit, delete and vote posts and comments.
- Incorporated the fundamental aspects of building web app using React and learned how to use Redux to improve the predictability of state management.
- Used documented API endpoints to connect with local backend development server which is built in NodeJS.

Mobile Flashcards — April. - May 2018

- Built a mobile app (Android and iOS) that allows users to create different categories of flashcards called "decks", add flashcards to those decks, then take quizzes on those decks.
- Gained an understanding of how to use React Native to build an iOS and Android app

Workout Hard Way — May. - August 2017
Poster: https://drive.google.com/file/d/1QKFskJkhSFdaTsS08ykKLGc1bxv-kmbX/view

- Programmed the online fitness web app with Laravel PHP framework and MySQL as database on the Vagrant development environment. We imported 4 APIs for mobile platforms, maps and sharing.
- Collaborated with 5 teammates to plan, learn, code, test, present following the agile process
- Arrange work for teammates and teach some of teammates to understand MVC and solve problems.

Education

BSc: Computing and Math — Simon Fraser University
